

The TELEMAC-MASCARET system is only compatible with the 1.2.0 version of the AED2 library, which you can download from [here](#):

Uncompress the file, go to the aed2_1.2 directory and enter the following command to build AED2 as a shared library:

```
make -shared
```

Then, to install the library to a specific folder, e.g. \$HOME/opt/aed2-1.2, you need to do the following:

```
mkdir -p ~/opt/aed2-1.2/include  
mkdir ~/opt/aed2-1.2/lib  
cp *.mod ~/opt/aed2-1.2/include  
cp include/* ~/opt/aed2-1.2/include  
cp libaed2.so ~/opt/aed2-1.2/lib
```
