

# Installation of GOTM on Linux

You can download the sources from [here](#)

Uncompress them and run the following commands from the uncompressed folder:

```
mkdir build
cd build
cmake .. -DGOTM_USE_NetCDF:BOOL=OFF -DBUILD_SHARED_LIBS=ON
make
make install
```

If you want to specify where to install the library, use CMake with the following options:

```
cmake .. -DCMAKE_INSTALL_PREFIX:PATH=<install-path>
-DGOTM_USE_NetCDF:BOOL=OFF -DBUILD_SHARED_LIBS=ON
```

Replace [<install-path>](#) with the path where you want to install GOTM.  
This folder must be different from the folder where you unpacked the sources.
