Installing of HDF5 on Linux

If you have sudo rights, you can install HDF5 using your OS package manager, such as apt in the case of Debian-like distros:

```
sudo apt install libhdf5-dev hdf5-tools
```

Otherwise you need to build HDF5 from its sources, which you can download from here Decompress them, then run the following commands:

```
./configure
make
sudo make install
```

If you want to specify where to install the software. Replace:

```
./configure
```

by

```
./configure --prefix=<install-path>
```

Where <install-path> is the absolute path to the directory where you want to install HDF5.
