

Installation on Windows

1. Download the automatic installer from [here](#).
2. Run it as administrator.

If your network has a proxy you will need to follow or get an error during the download of the TELEMAC-MASCARET system.

Follow the procedure on the following page [Manual Install](#)

If any other problems arise please post your error on the forum in the Windows section (link [here](#))

To check that your installation is working properly follow the instruction on this [how_to_run_a_simulation](#)
